IEE Proceedings Part C

Generation, Transmission and Distribution

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom.
Publishing Department: PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, United Kingdom

Volume 135 1988 UK ISSN 0143–7046

HONORARY EDITORS

Dr. M.C. Ralph (*NEI Parsons Ltd*)
Prof. J.R. Smith (*University of Aberdeen*)

Pages in issues of *IEE Proceedings Part C*, 1988

Pages	Issue No.	Date
1–80	1	January
81–168	2	March
169–260	3	May
261–368	4	July
369–468	5	September
469–528	6	November

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to twenty copies of an IEE paper or article.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $3.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0143–7046/88 $3.00 + 0.00. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The telephone number of the IEE London office is 01 240 1871; telex 261176 IEELDN G, facsimile: 01 240 77 35.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ALGORITHMS

Computer assessment of IDMT relay performance for phase and earth faults on interconnected power systems. D. Lidgate and H. Askarian Abyaneh p157
Diakoptic mesh analysis of limited size power supply systems. K. Gregory, J.G. Kettleborough and I.R. Smith p124
Dynamic response analysis of marine power systems. Ta-Peng Tsao, Shi-Lin Chen, Ching-Lien Huang and Wei-Cheng Lin p74 e308
Optimal operational planning for a hydro-electric generation system. D. Lidgate and B.H. Amir p169
Parallel processor algorithm for power system simulation. M. Rafian, M.J.H. Sterling and M.R. Irving p285
Realistic power system security algorithm. A. Mohamed and G.B. Jasmon p98
Simulation model for optimising energy allocation to hydro-electric and thermal plants in a mixed thermal/hydro-electric power system. U. Navon, I. Zur and D. Weiner p182
Two-level state estimation for large power system Part 1: Algorithms. K.L. Lo, M.M. Salem, R.D. McColl and A.M. Moffatt p299

BREAKDOWN AND GAS DISCHARGES

Diagnostic measurements at UHF in gas insulated substations. B.F. Hampton and R.J. Meats p137

CABLES AND OVERHEAD LINES

20 years on — can the UK regain the lead?. D.R. Edwards p9
Alternative solution for the Chowdhuri–Gross model of lightning-induced voltages on power lines. M.K. Haldar and A.C. Liew p324
New monitor for pollution on power line insulators Part 2: Simulated field tests. M. Khalifa, A. El-Morshedy, O.E. Gouda and S.E.-D. Habib p24
Scheme, based on travelling-waves, for the protection of major transmission lines. C. Christopoulos, D.W.P. Thomas and A. Wright p63
Thermal analysis of a multicore cable. D.S. Thompson and M.R. Wilson p79

CIRCUIT BREAKERS AND CIRCUIT BREAKING

Arc transfer in a rotary arc circuit breaker. Q. Jiali and G.R. Jones p511
Shunt reactor switching tests in BC Hydro's 500 kV system. D.F. Peelo, B.L. Avent, J.E. Drakos, B.C. Giudici and J.R. Irvine p420
Use of an auto-expansion circuit breaker in a ring main unit. G. Bernard, G. Perrissin and J. Marzocca p219

CLOSED-LOOP SYSTEMS

Wide-range power system pole placer. H.M. Soliman and M.M.F. Sakr p195

COMPONENTS

Block pulse functions based algorithm for symmetrical components calculation. S.R. Kolla p487

COMPUTER APPLICATIONS

Computer assessment of IDMT relay performance for phase and earth faults on interconnected power systems. D. Lidgate and H. Askarian Abyaneh p157
Computer-based supervisory control and energy management system for the city of Cape Town. A.P.J. Malt, G.D. Clarke and P.E. Robinson p41
Generation expansion planning: an expert system approach. S.A. Farghal, M.S. Kandil and M.R. Abdel-Aziz p261
MCHSE: a versatile framework for the design of two-level power system state estimators. J.F. Marsh and M. Azzam p291
Optimal operational planning for a hydro-electric generation system. D. Lidgate and B.H. Amir p169
Two-level state estimation for large power system Part 1: Algorithms. K.L. Lo, M.M. Salem, R.D. McColl and A.M. Moffatt p299
Two-level state estimation for large power system. Part 2: Computational experience. K.L. Lo, M.M. Salem, R.D. McColl and A.M. Moffatt p309

COMPUTER SIMULATION

Computation of temperature field and moisture content in the vicinity of current carrying underground power cables. G.J. Anders and H.S. Radhakrishna p51
Digital simulation of *B/H* excursions for power system studies. S. Ray p202
RF analysis of a 12-pulse HVDC convertor. R.V. DeVore, D.F. Kimball, D.G. Kasten and R. Caldecott p210

CONTROL SYSTEMS

Computer-based supervisory control and energy management system for the city of Cape Town. A.P.J. Malt, G.D. Clarke and P.E. Robinson p41
Modelling, analysis and control of a wind-turbine driven self-excited induction generator. Y. Üçtuğ and M. Demirekler p268
Phase-locked oscillator control system for thyristor-controlled reactors. J.D. Ainsworth p146
Software control of static reactive current compensators. P.T. Ho and S.K. Tso p518

CONVERTORS

RF analysis of a 12-pulse HVDC convertor. R.V. DeVore, D.F. Kimball, D.G. Kasten and R. Caldecott p210

DESIGN

Co-ordinated design of multimachine power system stabilisers based on damping torque concepts. M.J. Gibbard p276

DIGITAL CONTROL

Design of a digital protection scheme for power transformers using optimal state observers. Y.V.V.S. Murty, W.J. Smolinski and S. Sivakumar p224

DIGITAL INSTRUMENTATION

Co-operative research into the engineering and design of a new digital directional comparison scheme. A.T. Johns and E.P. Walker p334

DISTRIBUTION NETWORKS

Diakoptic mesh analysis of limited size power supply systems. K. Gregory, J.G. Kettleborough and I.R. Smith p124
New method for transmission planning using mixed-integer programming. M.A. Farrag and M.M. El-Metwally p319

EARTHING

Proximity effects on the ground fault current distribution within the earthing system formed by a substation and the associated transmission lines. J.M. Nahman p497

ELECTRICAL MACHINES

Wide-range power system pole placer. H.M. Soliman and M.M.F. Sakr p195

ENGINEERING ADMINISTRATION AND MANAGEMENT

Cost/benefit approach to establish optimum adequacy level for generating system planning. R. Billinton and J. Oteng-Adjei p81

FAULT DETECTION

Co-operative research into the engineering and design of a new digital directional comparison scheme. A.T. Johns and E.P. Walker p334
Design of a digital protection scheme for power transformers using optimal state observers. Y.V.V.S. Murty, W.J. Smolinski and S. Sivakumar p224
Scheme, based on travelling-waves, for the protection of major transmission lines. C. Christopoulos, D.W.P. Thomas and A. Wright p63

FAULT LOCATION

New algorithm for distance protection of high voltage transmission lines. M. Fikri and M.A.H. El-Sayed p436

FINANCIAL MANAGEMENT

Optimal consumer response for electricity spot pricing. A.K. David p378

GENERATORS

Comparison of transient performance of superconducting and conventional generators in a multimachine system. S.M. Osheba, M.A.A.S. Alyan and Y.H.A. Rahim p389
Excitation balancing of a self-excited induction generator for maximum power output. J.L. Bhattacharya and J.L. Woodward p88
Modelling, analysis and control of a wind-turbine driven self-excited induction generator. Y. Üçtuğ and M. Demirekler p268
Photovoltaic power generators for radio communication systems in Jordan. H.M. El-Zayyat and M. Mahmoud p385

HAZARDS

Diagnostic measurements at UHF in gas insulated substations. B.F. Hampton and R.J. Meats p137
Thermal analysis of a multicore cable. D.S. Thompson and M.R. Wilson p79

HYDROELECTRIC POWER GENERATION

Optimal operational planning for a hydro-electric generation system. D. Lidgate and B.H. Amir p169
Simulation model for optimising energy allocation to hydro-electric and thermal plants in a mixed thermal/hydro-electric power system. U. Navon, I. Zur and D. Weiner p182

INSULATORS AND INSULATION

New monitor for pollution on power line insulators Part 2: Simulated field tests. M. Khalifa, A. El-Morshedy, O.E. Gouda and S.E.-D. Habib p24

INTERFERENCE

Ripple control interference at irrigation installations. P.S. Bodger and T.B. Norriss p503

LIGHTNING AND LIGHTNING PROTECTION

Alternative solution for the Chowdhuri–Gross model of lightning-induced voltages on power lines. M.K. Haldar and A.C. Liew p324

LOAD AND VOLTAGE REGULATION

Cost/benefit approach to establish optimum adequacy level for generating system planning. R. Billinton and J. Oteng-Adjei p81
Excitation balancing of a self-excited induction generator for maximum power output. J.L. Bhattacharya and J.L. Woodward p88
Optimal operational planning for a hydro-electric generation system. D. Lidgate and B.H. Amir p169
Phase-locked oscillator control system for thyristor-controlled reactors. J.D. Ainsworth p146
Realistic power system security algorithm. A. Mohamed and G.B. Jasmon p98
Wide-range power system pole placer. H.M. Soliman and M.M.F. Sakr p195

LONG-TERM PLANNING

British system operation experience. A. Myles p233
Cost/benefit approach to establish optimum adequacy level for generating system planning. R. Billinton and J. Oteng-Adjei p81
Generation expansion planning: an expert system approach. S.A. Farghal, M.S. Kandil and M.R. Abdel-Aziz p261
Parallel processor algorithm for power system simulation. M. Rafian, M.J.H. Sterling and M.R. Irving p285

MAGNETIC DEVICES AND PROPERTIES

Digital simulation of *B/H* excursions for power system studies. S. Ray p202

MANAGEMENT

Power projects: the role of the contractor. K.M. Odell p1

MATHEMATICAL TECHNIQUES

Diakoptic mesh analysis of limited size power supply systems. K. Gregory, J.G. Kettleborough and I.R. Smith p124
Dynamic modelling for retaining selected portions of interconnected power networks. M. Brucoli, M. La Scala, N. Pitrone and M. Trovato p118
Identification of optimum site for power system stabiliser applications. D.R. Ostojic p416
Network parameter estimation using online data with application to transformer tap position estimation. Th. Van Cutsem and V.H. Quintana p31
Power system steady state stability assessment using catastrophe theory. A.A. Sallam p189
Real-time analytic sensitivity method for transient security assessment and preventive control. Y. Xue, Th. Van Cutsem and M. Ribbens-Pavella p107
Representation of transformer magnetising characteristic by the extended logistic model. E.H. Barakat and L.N. Abdul-Aal p144

MATRIX ALGEBRA

Irregular wave propagation characteristics in underground transmission cables. Prof. J.A. Brandão Faria p131
MCHSE: a versatile framework for the design of two-level power system state estimators. J.F. Marsh and M. Azzam p291

MODELLING

Alternative solution for the Chowdhuri–Gross model of lightning-induced voltages on power lines. M.K. Haldar and A.C. Liew p324
Approach to the study of small-perturbation stability of multimachine systems. C.T. Tse and S.K. Tso p396
Co-ordinated design of multimachine power system stabilisers based on damping torque concepts. M.J. Gibbard p276
Development of analytical techniques for system damping evaluation. I.A. Erinmez, P. Humphreys and S.S. Geeves p238
Digital simulation of *B/H* excursions for power system studies. S. Ray p202
Dynamic modelling for retaining selected portions of interconnected power networks. M. Brucoli, M. La Scala, N. Pitrone and M. Trovato p118
Generation expansion planning: an expert system approach. S.A. Farghal, M.S. Kandil and M.R. Abdel-Aziz p261
Modelling, analysis and control of a wind-turbine driven self-excited induction generator. Y. Üçtuğ and M. Demirekler p268
New method for transmission planning using mixed-integer programming. M.A. Farrag and M.M. El-Metwally p319
Optimal consumer response for electricity spot pricing. A.K. David p378
Power system steady state stability assessment using catastrophe theory. A.A. Sallam p189
RF analysis of a 12-pulse HVDC convertor. R.V. DeVore, D.F. Kimball, D.G. Kasten and R. Caldecott p210

MONITORING

Diagnostic measurements at UHF in gas insulated substations. B.F. Hampton and R.J. Meats p137
New monitor for pollution on power line insulators Part 2: Simulated field tests. M. Khalifa, A. El-Morshedy, O.E. Gouda and S.E.-D. Habib p24

NETWORKS

Dynamic modelling for retaining selected portions of interconnected power networks. M. Brucoli, M. La Scala, N. Pitrone and M. Trovato p118
Network parameter estimation using online data with application to transformer tap position estimation. Th. Van Cutsem and V.H. Quintana p31

NONDESTRUCTIVE TESTING

Shunt reactor switching tests in BC Hydro's 500 kV system. D.F. Peelo, B.L. Avent, J.E. Drakos, B.C. Giudici and J.R. Irvine p420

OPTIMISATION

Installation of power system stabilisers and the evaluation of settings. K.M. Trantor p244
Simulation model for optimising energy allocation to hydro-electric and thermal plants in a mixed thermal/hydro-electric power system. U. Navon, I. Zur and D. Weiner p182

OVERVOLTAGES

Prediction of DC load-rejection dynamic overvoltages using pattern recognition. E.A. Mohamed and G.W. Swift p480

PATTERN RECOGNITION

Prediction of DC load-rejection dynamic overvoltages using pattern recognition. E.A. Mohamed and G.W. Swift p480

POWER SYSTEM PROTECTION

Block pulse functions based algorithm for symmetrical components calculation. S.R. Kolla p487
Co-ordinated design of multimachine power system stabilisers based on damping torque concepts. M.J. Gibbard p276
Computer assessment of IDMT relay performance for phase and earth faults on interconnected power systems. D. Lidgate and H. Askarian Abyaneh p157
New algorithm for distance protection of high voltage transmission lines. M. Fikri and M.A.H. El-Sayed p436

POWER SYSTEMS AND PLANT

Approach to the study of small-perturbation stability of multimachine systems. C.T. Tse and S.K. Tso p396
Circuit allocation in subtransmission switching substations using best-first search strategy. Kit Po Wong and Hon Nin Cheung p489
Design optimisation of power system stabilisers based on modal and eigenvalue-sensitivity analyses. C.T. Tse and S.K. Tso p406
Fast methods for direct assessment of power system transient stability. F.J. Al Azzawi, F.F. Al Baldawi and C.L. Narayana p469
Incorporation of load models in the direct method of power system transient stability. M.M. Abu-Elnaga, M.A. El-Kady and R.D. Findlay p474
Load forecasting under spot pricing. A.K. David p369
Power projects: the role of the contractor. K.M. Odell p1
Prediction of DC load-rejection dynamic overvoltages using pattern recognition. E.A. Mohamed and G.W. Swift p480
Proximity effects on the ground fault current distribution within the earthing system formed by a substation and the associated transmission lines. J.M. Nahman p497

POWER TRANSMISSION AND DISTRIBUTION

20 years on — can the UK regain the lead?. D.R. Edwards p9
British system operation experience. A. Myles p233
Computer-based supervisory control and energy management system for the city of Cape Town. A.P.J. Malt, G.D. Clarke and P.E. Robinson p41
Development of analytical techniques for system damping evaluation. I.A. Erinmez, P. Humphreys and S.S. Geeves p238
Dynamic response analysis of marine power systems. Ta-Peng Tsao, Shi-Lin Chen, Ching-Lien Huang and Wei-Cheng Lin p74 e308
Installation of power system stabilisers and the evaluation of settings. K.M. Trantor p244
MCHSE: a versatile framework for the design of two-level power system state estimators. J.F. Marsh and M. Azzam p291
Parallel processor algorithm for power system simulation. M. Rafian, M.J.H. Sterling and M.R. Irving p285
Power projects: the role of the contractor. K.M. Odell p1
Power system steady state stability assessment using catastrophe theory. A.A. Sallam p189
Programme of system proving tests and operational experience. C.M. Gibson p255
Realistic power system security algorithm. A. Mohamed and G.B. Jasmon p98
Testing of power system stabilisers. R.F.B. MacLaren p251

PROJECT MANAGEMENT

Co-operative research into the engineering and design of a new digital directional comparison scheme. A.T. Johns and E.P. Walker p334
Power projects: the role of the contractor. K.M. Odell p1

RADIOCOMMUNICATION

Photovoltaic power generators for radio communication systems in Jordan. H.M. El-Zayyat and M. Mahmoud p385

RELAYS

Co-operative research into the engineering and design of a new digital directional comparison scheme. A.T. Johns and E.P. Walker p334
Digital protective relaying through recursive least-squares identification. A. Isaksson p441
New algorithm for distance protection of high voltage transmission lines. M. Fikri and M.A.H. El-Sayed p436

RELIABILITY

Evaluating the approximate probability distributions of load point reliability indices in power distribution networks. E.N. Dialynas p450

REVIEWS OF PROGRESS

Photovoltaic power generators for radio communication systems in Jordan. H.M. El-Zayyat and M. Mahmoud p385

SIMULATION

Parallel processor algorithm for power system simulation. M. Rafian, M.J.H. Sterling and M.R. Irving p285
Simulation model for optimising energy allocation to hydro-electric and thermal plants in a mixed thermal/hydro-electric power system. U. Navon, I. Zur and D. Weiner p182

SOLAR CELLS

Photovoltaic power generators for radio communication systems in Jordan. H.M. El-Zayyat and M. Mahmoud p385

STABILISERS

British system operation experience. A. Myles p233
Co-ordinated design of multimachine power system stabilisers based on damping torque concepts. M.J. Gibbard p276
Identification of optimum site for power system stabiliser applications. D.R. Ostojic p416
Installation of power system stabilisers and the evaluation of settings. K.M. Trantor p244
Programme of system proving tests and operational experience. C.M. Gibson p255
Testing of power system stabilisers. R.F.B. MacLaren p251

STABILITY

Approach to the study of small-perturbation stability of multimachine systems. C.T. Tse and S.K. Tso p396
British system operation experience. A. Myles p233
Design optimisation of power system stabilisers based on modal and eigenvalue-sensitivity analyses. C.T. Tse and S.K. Tso p406
Development of analytical techniques for system damping evaluation. I.A. Erinmez, P. Humphreys and S.S. Geeves p238
Dynamic modelling for retaining selected portions of interconnected power networks. M. Brucoli, M. La Scala, N. Pitrone and M. Trovato p118
Fast methods for direct assessment of power system transient stability. F.J. Al Azzawi, F.F. Al Baldawi and C.L. Narayana p469
Incorporation of load models in the direct method of power system transient stability. M.M. Abu-Elnaga, M.A. El-Kady and R.D. Findlay p474
Phase-locked oscillator control system for thyristor-controlled reactors. J.D. Ainsworth p146
Power system steady state stability assessment using catastrophe theory. A.A. Sallam p189
Programme of system proving tests and operational experience. C.M. Gibson p255

Real-time analytic sensitivity method for transient security assessment and preventive control. Y. Xue, Th. Van Cutsem and M. Ribbens-Pavella p107
Wide-range power system pole placer. H.M. Soliman and M.M.F. Sakr p195

SUPERCONDUCTIVITY

20 years on — can the UK regain the lead?. D.R. Edwards p9
Comparison of transient performance of superconducting and conventional generators in a multimachine system. S.M. Osheba, M.A.A.S. Alyan and Y.H.A. Rahim p389

SWITCHES AND SWITCHING THEORY

Criteria for interfeeder switching in distribution systems. C.S. Chen, J.S. Wu and Y.N. Chang p461

SWITCHGEAR

Circuit allocation in subtransmission switching substations using best-first search strategy. Kit Po Wong and Hon Nin Cheung p489
Specified current in emergency load switches. P.D. Bourkas, E.A. Kayafas and A.V. Machias p330

SYSTEM PROTECTION

Design of a digital protection scheme for power transformers using optimal state observers. Y.V.V.S. Murty, W.J. Smolinski and S. Sivakumar p224
Use of an auto-expansion circuit breaker in a ring main unit. G. Bernard, G. Perrissin and J. Marzocca p219

TOLERANCE ANALYSIS

Specified current in emergency load switches. P.D. Bourkas, E.A. Kayafas and A.V. Machias p330

TRANSFORMERS

Design of a digital protection scheme for power transformers using optimal state observers. Y.V.V.S. Murty, W.J. Smolinski and S. Sivakumar p224
Network parameter estimation using online data with application to transformer tap position estimation. Th. Van Cutsem and V.H. Quintana p31
Representation of transformer magnetising characteristic by the extended logistic model. E.H. Barakat and L.N. Abdul-Aal p144

TRANSIENTS

Comparison of transient performance of superconducting and conventional generators in a multimachine system. S.M. Osheba, M.A.A.S. Alyan and Y.H.A. Rahim p389
Real-time analytic sensitivity method for transient security assessment and preventive control. Y. Xue, Th. Van Cutsem and M. Ribbens-Pavella p107
Shunt reactor switching tests in BC Hydro's 500 kV system. D.F. Peelo, B.L. Avent, J.E. Drakos, B.C. Giudici and J.R. Irvine p420
Two-level state estimation for large power system Part 1: Algorithms. K.L. Lo, M.M. Salem, R.D. McColl and A.M. Moffatt p299
Two-level state estimation for large power system. Part 2: Computational experience. K.L. Lo, M.M. Salem, R.D. McColl and A.M. Moffatt p309

TRANSMISSION AND DISTRIBUTION PLANT

Digital simulation of *B/H* excursions for power system studies. S. Ray p202
Evaluating the approximate probability distributions of load point reliability indices in power distribution networks. E.N. Dialynas p450
RF analysis of a 12-pulse HVDC convertor. R.V. DeVore, D.F. Kimball, D.G. Kasten and R. Caldecott p210
Specified current in emergency load switches. P.D. Bourkas, E.A. Kayafas and A.V. Machias p330
Use of an auto-expansion circuit breaker in a ring main unit. G. Bernard, G. Perrissin and J. Marzocca p219

TRANSMISSION LINES

Digital protective relaying through recursive least-squares identification. A. Isaksson p441
Irregular wave propagation characteristics in underground transmission cables. Prof. J.A. Brandão Faria p131
New method for transmission planning using mixed-integer programming. M.A. Farrag and M.M. El-Metwally p319

UNDERGROUND CABLES

Computation of temperature field and moisture content in the vicinity of current carrying underground power cables. G.J. Anders and H.S. Radhakrishna p51
Irregular wave propagation characteristics in underground transmission cables. Prof. J.A. Brandão Faria p131

Addresses

Edwards, D.R. Address as Chairman of the IEE Science, Education & Technology Division: Supertension or superconducting cables: 20 years on — can the UK regain the lead? p9
Odell, K.M. Address as Chairman of the IEE Power Division: Power projects: the role of the contractor p1

Book reviews

Siemens electrical installations handbook (2nd edition) G. Gerrard p166
